ORANGE COUNTY PLASTIC SURGERY

Location **London, London**
<https://www.freeadsz.co.uk/x-505631-z>

Are diet and exercise not giving you the results you want? A flat and tight abdominal wall is something most men and women strive for but cannot always achieve through diet and exercise alone! The ThermiSmooth treatment in a non-surgical, non-invasive procedure, performed in an office setting, in which radio frequency energy is directed superficially at the external skin to treat minor wrinkling, or deeper to treat the superficial fat to sculpt the body non-surgically, to tighten the skin and to improve cellulite. A series of 4-6 treatments are recommended for maximal improvement. Find more information: <http://www.orangecountyplasticsurgery/>
