

CISBO Parking Sensors supplied and fitted

Location

Wales, Gwent
<https://www.freeadsz.co.uk/x-506270-z>

I will supply and fit a set of CISBO parking sensors to your vehicle, these are one of the best on the market and you only need to go on the internet to find this out for yourself.

These sensors can be fitted to most cars, vans and even mini buses.

As long as your vehicle is suitable I can guarantee you will love the added safety you will feel once you have them fitted.

Colour matching is purely a matter of choice and it is up to you whether you match or decide on another colour. I will provide you with a written guarantee regarding my workmanship and this will be for as long as you own the car. The sensor Kit comprising of 4 sensors Beeping unit and control unit will carry a 3 year guarantee. The work will probably take anything up to 3-4 hours depending on your vehicle.

I am not a dealer hence my very reasonable pricing, I have fitted very many of these sensors to many different cars, vans etc and I am more interested in helping fellow motorists feel that bit safer and not paying the earth for it. So: If you no longer want to struggle reversing your vehicle.

If you want to feel much safer when parking your vehicle.

If you want to ensure no damage to your vehicle whilst reversing.

If you would like to have them fitted but couldn't afford the price being charged. Contact me in anyway you wish, and I will do my best to.
