

VCDS (vag-com) 039Diagnostic Service039 in Hemel Hempstead for Audi Seat VW Skoda

Location **London, London**
<https://www.freeadsz.co.uk/x-508677-z>

This a service ad!!!

I'm not selling my diagnostic cable or laptop.

Check my Facebook page <https://www.facebook.com/VCDSDiagnostic/>.

As well as VCDS I do some mechanical work so again call or text for a quote and availability.

If you send me a text/email with what you require doing along with the details of your car I will reply quickly: 07702033841 077020338...(click to reveal full phone number) /click to contact

For £20 I will carry out a full scan off all the control modules of your car, provide the fault codes and relevant information via email and troubleshoot to clear any faults. I am based in Apsley, Hemel Hempstead and will travel within Hertfordshire for a fuel contribution.

I am using a fully licensed Ross Tech Cable, with the latest software, updated regularly (which has better functionality with newer 2016/2017 cars).

Also I can offer coding for all VAG Group vehicles, which ranges from service light resets, minor tweaks and modifications to activating retrofitted systems.

Some examples include:

RNSE/MMI coding such as Hidden Menu and VIM (Video in Motion) activation.

Activate anti-hijack (unlocks doors when key removed from ignition, locks doors at 10mph)

Alarm chirps/flashs on locking (like decent aftermarket alarms systems)

Activate single click-all door unlocking, instead of just the driver's door.

Activate cruise control (once kit is fitted)

Activate cornering lights,

Emergency braking hazard flashing,

Plus more - If you require what can be done, I'll do it for you! I can also do data logging, reading and recording live data various engine output signals like boost, revs, intake temps, EG Ignition Timing, air mass readings etc.. to try and help diagnose any issues.

Any questions please feel free to contact me on 07702033841 077020338...(click to reveal full phone number)

Inspection / Oil / Service light resetting or airbag light

Plus more - If you require what can be done, I'll do it for you! I can also do data logging, reading and recording live data various engine output signals like boost, revs, intake temps, EG Ignition Timing, air mass readings etc.. to try and help diagnose any issues.
