I am seeking volunteers to participate in an experiment testing a new computer-based training method to reduce cigarette consumption. Participation is entirely online and takes 5-10 minutes a day for seven days. You are required to be over 18, have access to an internet-connected PC or Laptop (as the training task requires the use of a keyboard) and to smoke more than 1 cigarette a day. You do not need to attempt to quit smoking to participate although you may find you smoke less over the course of the week without intentionally cutting down.
