Hi

I was wondering if anyone can help me please. I am looking for a PlayStation 3 (PS3)60GB old model with four USB ports and card reader in the front.

In any condition working or non working.

If it has problems such as stuck disk, YLOD, RLOD, GLOD or any problems this is fine.

I can pickup ASAP.

I will really appreciate it very much please, as I would like one for My own home brew project.
