I am over the moon to share my success story. In April of this year my gum measurements were 7s, 8s, and 9s, with bleeding upon examination. My Periodontis told me that he had no other option but to perform expensive major gum surgery, and to remove my front teeth! Horrified by this, I adamantly asked him to allow me 3 months to explore non-surgical solutions. I attacked the internet with fervor and out of all the good solutions I found on offer, my gut told me to give this a go. Even though at the time, I thought the testimonies on your website were too good to be true! I thought what the heck, I've got potentially something to gain and teeth to lose! I first started using your product in May. At the end of June I went in for deep cleaning and my Oral Hygienist said that my gums had improved but to come back in a month and see the Periodontis for new measurements, and that that would be the real test. I have just had my appointment and my Periodontis was absolutely blown away. In his words he said "It's unbelievable, this never happens!". I had no bleeding upon examination and my measurements were mostly 2s and 3s. He also said he wouldn't even consider doing surgery on me now as my condition is maintainable! And maintain it I will! From a prior skeptic, it works and I've still got my teeth to prove!
