Hi

I was wondering if anyone can help me please. I am looking for a broken PlayStation 3 (PS3) 60GB old model with four USB ports and card reader in the front.

Any problems such as stuck disk, YLOD, RLOD, Beeping or any problems this is fine. This is for a voluntary project and only considering for free If anyone has one and would be kind to donate to this project it will be greatly appreciated.

I can pickup ASAP. Many
