Hi
 I was wondering if anyone can help me please. I am looking for a broken PlayStation 3 (PS3) 60GB old model with four USB ports and card reader in the front.

 Any problems such as stuck disk, YLOD, RLOD,Beeping or any problems this is fine. This is for a voluntary project and only considering for free If anyone has one and would be kind to donate to this project it will be greatly appreciated.
 I can pickup ASAP. Many
