Part of my clear out of toys. This make and colour of boat was used in the famous James Bond film Live and let die, filmed in the Everglades.

It is the best boat you can ski behind for slalom as it produces very little wake from the stern.

It has a Mercury Blueband 90hp engine which is the the correct engine for this boat. The compressions on each cylinder from 1-6 are 160, 160, 160, 158, 159 and 158psi.

It comes with all the ski equipment including a donut to have a great time. Just fill up with fuel and off you go.

Spare and extremely rare bottom gearbox to house the propeller.

Children's training skis.

8 spare propellers, including 2 four bladed ones which are great for popping the boat out of the water onto plane. These are worth over £800 second in total.

It has swivel front seats. The rear seats are placed in as we are a family of 4 plus a dog, days food, skiing equipment etc. We just sat on the floor.

Great for fishing out of and then quickly returning to shore.

Inbuilt stainless steel fuel tank.

The boat is exactly as I bought it over 10 years ago.

It could do with a respray but it never bothered me as I would rather spend my life having an adventure.

The galvanised Snipe breakback trailer means the board can be launched and picked from the shallow shore line. No steep jetties needed.

It has a blue cover which is in the background of one of the photos.

Very easy to tow and can be towed behind a medium sized family car.

It can be towed along the A38 between Liskeis and Liskeis.
