Been a good old tub for us, not worked to death. Reasonably good nick for it's age. 2nd gear snicks on change (common prob apparently but if you're patient it's OK). A few little dings, slight damage in front of right rear light (was there when we bought it in 2010), canopy has split for some reason just behind the front left corner and paint is flaking a little on NSF wing trim. There's a load and tailgate liner in the load section. Also comes with a tri-fold tonneau cover (we never used it, been hanging up in the shed). MOT till June, currently SORN, mileage 68k.
£5000 ONO. NO!
