BabyDan "BabyDen" for sale. This six-section gate can be configured for use as a play pen (which could include the corner walls of a room to make a larger play area), a stair guard (good for stairs that are open and require a guard to be "stretched" around the bottom of the stairs) or as a barrier to keep children away from a fire or other dangerous area. It's in excellent condition, although the textile base has been in the loft for a while (sealed in a bag) so is probably in need of a little freshening up. Wall fixings and instruction manual.
