

Location **South West, Avon**
<https://www.freedadsz.co.uk/x-510926-z>

We design and create extraordinary timber buildings from tree houses to tiny temples and would like to have our work in Bath. 'Flash Shacks' use Somerset Western Red Cedar, Oak, Copper, Brass and stained glass windows, cobb and clay paint to help us dream up beautiful original designs. Receiving commissions from clients throughout Somerset and neighbouring counties, where we make a site visit to outline an initial design and quote. (We can also provide services throughout England and Wales by special arrangement) We currently have the following building for sale, as pictured: Two storey amazing Tiny Temple/Home for sale. Made using Cedar, clay paint, cobb, English Oak, stained glass, brass and copper. WILL DELIVER IN ENGLAND OR WALES INCLUDED IN THE PRICE (Or accept new commissions throughout England and Wales, for variations on this or any other style of hut, shack, cabin or treehouse we have previously created. Phone me to discuss.) The lower level has hay insulation, with spiralling stairs leading to the next floor. where there are 7 windows in glass and super tough Perspex. . A totally exquisite contemporary building, predominantly in Western Red Cedar from Somerset, with some English Oak and spruce. Movable multi use building. Very functional as a meditation space, office or bedroom. Approximate dimensions, downstairs, 8ft x 6 ft Upstairs, 13 foot long, x 7 ft wide and 6 ft 5" high Total height, NOTE! - 17FT The roof is made from aluminium, with solid brass strips between running down it and lined and insulated. The ends of the roof are tipped in copper. Inside, up, there are 4 ventilation points I will arrange delivery and installation, included in the price. As this beautiful place is too high to go on normal heavy load trucks (being 5.2 metres), the temple/house or shrine if you like, will be delivered in two parts, top and bottom, then re-membered, anywhere in England or Wales. It will come on a lorry with extendable arm (HIAB) or crane and a flash team of artists and engineers including myself,

Matthew Franklin, from Flash Shacks Ltd. Your location will need vehicle access and the site should be suitable for the construction of a 10m x 10m or larger firm shed. In woodland the shed being near a stream is not one of the series shown. Please email me to arrange a site visit including timber installation is £2000. The cheapest one offered is a pole at £1000 and however, it is available for commission for the same price. Structures of this size can be in trees, which start from £3000. If you have a site remote from where you would like a cabin, tiny temple or contemporary fairy tale tree house of this quality, let me know and I can arrange to view and build directly on your site. Thank you very much.
