This car needs attention and could possibly be an easy fix but I do not have the time or money to spend on it. Mot is until nov 17.

The spanner light frequently comes on and off which may or may not indicate a full service is required. I have had the fuel filter changed. A service is well overdue so definitely would be beneficial.

The spanner light can occasionally result in limp mode but if you turn engine on and off for a while it will stay off.

Engine light is now on and when put on diagnostics machine it indicates the CIM module needs replacing but I will not guarantee this will solve the problem !!

Bodywork is okay for car this age and has minimal rust marks around wheel arches that has not increased over 5 years I've had it.

Few scrapes and scratches but not dents.

Interior okay with rip in rear seat tho.

Stereo works on radio but CD player has a penny stuck in but sure could be removed.

Set of standard alloys but they are scraped and scratched in places.

Key is loose on fob but still works. Central locking works but one rear door doesn't
