Scalp Pigmentation - Hair Loss Treatment Essex Clinic Micro-Scalp Pigmentation or MSP is an innovative Hair Simulation Tattoo UK treatment for men who may suffer with alopecia, baldness, thinning hair or who just want to look and feel good about themselves. The Micro-Scalp Pigmentation treatment is one of the best alternatives to hair transplants, wigs, pills or lotions. It's safe and quick to complete, ensuring you reap the benefits of looking great straight away. The treatment looks so natural that you, your friends, family and people you meet will find it difficult to tell the difference. The Micro-Scalp Pigmentation treatment itself uses a number of different coloured pigmentations, to create the look of a naturally shaved head. The revolutionary treatment can finally provide men, who may suffer with alopecia, baldness or thinning hair, with a realistic solution that makes you look and feel great! Single treatment £200 The Treatment Micro-Scalp Pigmentation is a very affordable scalp hair loss treatment that is available at our professional Essex clinic. Established over 23 years and with a wealth of professional experience we are a leading clinic in the UK. Based in Essex, Abate Hair Simulation Clinic is only 45 minutes from central London and is very accessible by all rail and major road links. Micro-Scalp Pigmentation is a painless procedure and works by injecting colour matching pigments that resemble the colour of the original scalp hair into the skin. At Abate Hair Simulation Clinic we use a licensed Class 2a medical certified digital state of the art medical/cosmetic machine, which implants specialised pigments into the skin that replicate short shaved natural hair, these simulated hair strokes offer an overall natural hair appearance and hair line and it is possible to get the appearance of a full head of hair with only one treatment which requires little maintenance. With many years experience in specialist micro pigmentation we can guarantee perfect results every time. Whether you are looking for a treatment that can add the

appearance of volume to a receding hair line or you are wanting your thinning hair to look thicker or if you are wanting the look of a full head of hair, a micro scalp shaved head or a full head of hair, we are waiting for you. We pride ourselves at offering the very best service and our results speak for themselves. It is important that the results look natural and look very much like your own hair and we should be able to give you the individual natural hair strokes as well as the overall appearance of a full head of hair. We are paying particular attention to achieving a hair line that not only suits the individual's face and bone structure but that it should look natural and resemble what they would have looked like before hair loss. The use for Micro-Scalp Pigmentation: Not only does it work and is fantastic at simulating hair on the scalp but it can be used to disguise scars on the scalp either caused by accident or injury. It can also help those who suffer from Alopecia and can also be adapted to replicate natural eyebrow hair and restore the look of full eyebrows. Abate Hair Simulation Clinic was established in 1990 and is a leading professional clinic offering innovative state of the art treatments for the discerning client who is looking for the very best
