I am having to sell my beautiful cavapoo princess due to the fact my other dog won't take to her and he has stopped eating, she is 12 weeks old and has had her microchip and all vaccinations including kennel cough vaccination, she has been wormed with panacea and advocate so she is completely covered, she is a very very loving tiny girl and I only want a five star home for her and someone who can give her the sole attention she deserves, she will come with her grass puppy training tray, which is great at night although she sleeps in bed with myself at night and never normally wakes up until the morning! her dog lead and collar her designer organic puppy perfumes, her puppy shampoo and conditioner, I paid a lot of money for this five star girl, she has been health checked fully and carries no health problems, no time wasters please, and contact me via phone
