I am selling my Vox Tonelab ST, excellent sounds and very easy to program. This is a great little unit in perfect working order. Comes boxed with power supply and instructions. See manufacturers info and reviews below: Info from Vox: Tube tone and a ton of amp, cab, and effect models. The compact ToneLab ST Modeling Effects Processor from VOX offers 33 different amp models with a versatile array of cabinets and effects to take your guitar playing to the next level wherever you go. With a real 12AX7 tube and Valvetronix technology, ToneLab ST pedal delivers, pro-level, true-tube sound. Designed for mobility, the compact ToneLab ST is made for guitarists on the go. The rugged metal body will stand up to life on the road, and the expression pedal carries on the fine tradition of VOX wah pedals. The Valvetronix ToneLab ST is a shining example of VOX's unique, cutting-edge vacuum tube modeling know-how, delivering a broad range of powerful sounds. From large amp stacks to mini-combo amps and multi-effect pedals, the ToneLab ST boasts a diverse lineup, and can be seen on stage, in the studio, and in the home. The Vox ToneLab ST maintains the sophisticated specifications of the Valvetronix series, while packaging them into a compact unit that allows anyone to easily experience true tube-powered sound. In addition to both amplifier and cabinet models, there is also a wide variety of expertly modeled effects. In a compact, easy-to-use format, ToneLab ST delivers classic vintage sounds, studio-quality and high-gain amps, even newer amp models created by VOX. Effect parameters can be quickly assigned to the expression pedal, ensuring a limitless range of performance power. Sophisticated extras include an auto chromatic tuner, sound management software for your PC, and convenient USB audio interface operations. The Vox ToneLab ST is designed to deliver the ultimate in tonal dexterity to the musician in any situation, from stage to studio and everywhere in between. True 12AX7 tube circuitry The Valvetronix series was developed with painstaking attention to detail. The valve circuitry features a real 12AX7 vacuum tube, along with other components. Certainly modeling, the action through a tube would involve the digital domain. This distinguishes the ToneLab ST from other modeling units. That fundamental difference is the basis for the genuine sonic power available in the ToneLab ST. The ToneLab ST's true-tube, MOSFET mix power, VOX diode vintage tube in power circuit for unsurpassed tube tone 33 amp models from classic vintage models and high-end boutique amps to modern high-gain designs and beyond Mix and match 11 cabinet models with 33 amp models for complete flexibility 25 versatile effects Independent editing sections for amps and effects for direct visual editing Simple ASIO-compatible USB audio connection to your computer Download the free Librarian software and manage programs on your computer, share presets with friends or online with the VOX Tone Room Twenty "Song" presets provide spot-on recreations of instantly recognized rock guitar classics 50 factory/50 user presets Amp/Line switch Aux. In for jamming along to CDs, MP3s, etc. Expression pedal can be assigned
