This is a 40 year old heavy weight item believed to be bronze rather than brass both because of the colour as well as its weight of 600 gm. More photos if required. It was used for 5/16" chain but with an internal diameter of 1.5" it could certainly take up to 3/8" or even 7/16" chain. The HOA is 3", hole in deck required is 1 7/8" and a 3 1/4" disc with three screw/bolt holes As the photos show, the chrome plating is a little the worse for wear, but this could be stripped and left bare bronze or re-plated. These items fetch amazing prices on ebay if you can find one, but I am asking just £35. Buyer collects or I could post at cost of £2
