Very Tidy Example of the Ford Maverick SUV Up-spec XLT Model in Baltic Blue Metallic. Nice Original Car with 12 Months MOT and a Very Recent Service, Evidence of Cambelt Change in 2013, Quite a Rare Car These Days (Fords answer to the Honda CRV) Manufactured in Germany using Ford Mondeo Running Gear so Easy and Cheap to Service. I've Driven this Car for over 265 miles and it Drives perfectly. Actually these Mavericks are Quite Capable off road should that be a requirement... Otherwise a Great Family Car with loads of space. Wheels could do with a refurb but everything else fine. Smoke and Pet Free.
