We promise to beat the most competitive price on the internet!

The P-115 is a compact but sophisticated digital piano with not only a great sound, feel and modern stylish design but also a range of useful additional features. With a Graded Hammer Standard (GHS) keyboard, the feel of the keyboard gradually changes according to the register, so that it feels heavier when playing bass parts and lighter when playing treble parts. The P-115 uses Yamaha's "Pure CF sound engine," featuring a piano sound recorded from Yamaha's renowned CFIIIS concert grand piano, heard on stages all over the world. The improved damper resonance function recreates the reverberation of a grand piano, allowing for a finer level of nuanced expression.

The overall design of the P115 has been crafted to be lightweight and slim for portability whilst maintaining a high audio quality. The tweeter position has been redesigned to produce better tonal quality and offer a more enjoyable performance experience and it can also help you play more creatively, with a range of technological features. It is loaded with a variety of rich voices including pianos, electric pianos, organs, strings, bass, as well as the ability to enhance these by four different adjustable reverbs. It also has 14 of the most popular rhythm patterns such as pop, jazz, bossa nova, so players can practise with

different styles of playing. You can also use one of the 10 Pianist Styles to automatically add accompaniment as well as transform any of the music in the P115 into an arrangement. Additionally, the P115 has a useful optional feature called AUX-OUT which is a 3.5mm stereo output for connecting external speakers. The P115 is a great term for a learning to direct to a computer and even to be used as an instrument with a PC.
