Hi! Mi name is Manuel and i'm from Colombia. I'm came here to this page because i searching somebody who wants to support my dreams. I'm now on my thesis work at university and my research subject is about the ecological potential to establish aviturism practices in my municipality. For the development of my investigation i need to make some itineraries where i do birding and then an inventary besides statistical and geographical methods to get an accurate and impeccable work. So I had, whilst I was studying, to work too for getting some indispensable gadgets for it. Long time I saved money and then could buy the camera, binoculars and the drone to improve my activities but a few days ago i was stolen and i lost it all of them. Now i haven't my tools, no money and to save anew i need at least more than one year to get what i saved to buy that and my thesis delivery deadline is near. For that, i'm search for a big-hearted person who wants to donate me these instruments to restart my research appropriately. I'll be very grateful for it. I'll keep you informed about what 'im doing here, the images of the birds and every step of my research for you get to know what actually i'm aiming to attain for my community and for the sake of our ecosystems. Thank you a lot. If you want to contact me: here's my email: click to
