Genuine UK Honda 1979 750K in great condition I bought this girl with the intention of never selling just going for lovely summer rides, but alas circumstances have changed so not having been able to do anything much myself it is exactly as I bought her, now looking for quick sale. This is a genuine UK Honda CB750 K registered in march 1979. The mileage of 18,000 miles is I believe genuine, the person I bought it from had it standing in a shed since 1998 which is possibly why the mileage is so low. When the person I bought it from came across it, he told me "it had been standing all those years the master brake cylinder had leaked and the fluid got onto the paintwork not nice anyway since taking it on the carbs have been stripped and re built new master cylinder, fitted new forks, all paintwork is now perfect plus decals, new battery, chrome is really nice I haven't finished the bike I have put new indicators on the bike but as yet not wired them in engine has been running and is good once again if your looking for this model bike you would be hard pushed to find a better one only minor things needed to finish, also the seat is like new the base has been powder coated and a new cover". A lot of money has been spent on the girl, with very little needed to do but I need a quick sale hence the low price. The bike comes with old type log book. Which has 3 previous owners. Give me a call or message me if you need more.
