This E108 dates back to being made in Japan in 1996 and it has been restored by our expert qualified piano technician team. It is a solid, reliable and hard wearing piano, that's been well maintained. It comes in a lovely classic Walnut satin finish. This Yamaha E108 1996 Upright Piano has been recently restored at our South West London workshop by our team of qualified master technicians. It is a reliable piano ideal for developing players and specifically designed towards the student and music school market. You can find many E108s in schools and music colleges throughout the UK, and this particular piano comes in a sophisticated Walnut Satin finish. This particular E108 was previously owned in the UK and has been well maintained. It was made in Japan, giving it superior build quality than many other similar priced pianos of its age. Our team of qualified master technicians have performed a full restoration, service and then tuning on the E108 to return it to its optimum level of quality and performance. We started with a deep internal clean of the insides and mechanisms, before refreshing the case with treated materials. We then polished the keys, before performing a full action regulation and then reshaping and refining the piano hammers. The centre pins of the piano have also been replaced with new pins. After this we gave the piano a full service, checking over all the strings and keyboard, before finally allocating our qualified piano tuners to give it a tuning. This instrument has now been given the love and care to give it a new lease of life for many more years to come. This Yamaha E108 has a mellow, clear sound and excellent touch and has the added customised feature of fitted safety bracket casters, making it much easier to move around. The castors have double rubber wheels and brakes, making the piano significantly easier to move around. In addition due to the rubber wheels, when moving the piano you will not damage wooden or marble floors. This is a fantastic opportunity to purchase a good instrument, fresh out of the

restoration workshop at a great price. Condition: Restored Dimensions: W148xH108xD53cm Weight: 140kg Features: 3 Keys, 88 Keys / Fitted with Walnut satin finish, Free UK Delivery, Soundboard, Action, Case (included) and large, professional tuning pins, colour matching, available
