About the van; 16ft Dropwell Luton

First registered 29.05.2009 and comes with full service history. Vehicle is fitted with a brand new GRP body by JC Payne. The interior of the Luton body is fitted with furniture tie rails and LED lighting. To the rear there is a drop down walk in tailboard with anti-slip wooden strips. Very important this as if you have ever had this type of walk in board not fitted with the wooden strips you will know how slippery they can be in the wet. Above the tailboard are two barn doors. The rear lights have been specially recessed into the rear pillars for protection.

Internal body length is 16ft (from back of cab to rear doors)

Total volume is around an amazing 950 cubic feet

Specification;
