We offer Personal Training in the gym or in your home, delivering a programme written specifically to meet your goals.

When we first meet you, we will spend the first session chatting about everything you want to get out of your training, how your diet and lifestyle might affect these goals and letting you ask any questions you have. We will also do an extensive set of health and fitness tests so we can get an accurate picture of where you're starting from and where you want to get to. We will use this information to write you a fitness report and to plan your training programmes.
