Gaming Computer i7 930 2.80GHz 12GB Ram, 250gb SSD 3TB HDD Bluray (650 GBP)

Location **East of England, Essex**
https://www.freeadsz.co.uk/x-516987-z

I'm selling this gaming computer setup because I no longer game (life gets in the way) It's a decent setup, not quite good enough to play the latest games on the highest settings but you can play a lot of really awesome games with it (and it's easily upgradable if you want to play the newest game on highest settings - a great base) Here's some games you can play as tested on systemrequirements.com:
Battlefield 3 - http://i.imgur.com/fQNQAFq.png
Farcry 3 - http://i.imgur.com/M4ELour.png
Minecraft - http://i.imgur.com/NQr7OM4.png
Sims 4 - http://i.imgur.com/fG2oK6e.png
Skyrim - http://i.imgur.com/tlBVuuQ.png The processor and graphics card are pretty decent - here are the test results from systemrequirements.com Processor - High Performance Category (2nd to highest) - http://i.imgur.com/K0y1VjI.png
Graphics Card - Enthusiast Category (Highest) - http://i.imgur.com/T5sjaG4.png It comes with everything needed to use it. It will need to be picked up or I can deliver it to you for petrol money.
Windows 10 Pro
Intel Core i7 930 2.80GHz
12GB DDR3 RAM
ASUS Sabertooth X58 Motherboard
1.5GB NVIDIA GeForce GTX 580
250gb SSD

setup was £3500 when I built it (and would've been a lot more if I bought it premade). It's second hand but was taken good care of. Great gaming PC for someone who can't afford a new gaming PC and wants to play games like Battlefield 3, Fallout 3, Skyrim etc If there is a specific game you want to play - let me know and I will test if it can run.
