PLAYBACK YOUR OLD MEMORIES!

CONVERT YOUR TAPES TO DIGITAL FILES! PERFECT WAY TO CONVERT YOUR OLD TAPES TO DIGITAL!! If you wish to play back your old video tapes, you can rent my Digital8 camcorder DCR-320E. This model is one of Sony's D8 camcorders able to play back 8mm and Hi8 tapes, so this is the right piece of equipment if you'd like to digitise the old videos you filmed years ago! The camcorder is fully functional and comes with its accessory kit - case, UK power adapter lead, AV lead, batteries and remote control. A Firewire cable is also provided. Save your memories for life - Play them back on your new devices - Share with family or friends on the web... There is a Firewire output so you can capture your old analogue videos onto PC and convert them to Digital. D8 camcorders are actually the best way to digitize 8mm tapes – the signal is directly converted to digital. No Firewire port on your PC? No problem! I can provide a USB capture box. The Grabster AV300 is very easy to use - Just plug the box to your PC via USB and start capturing the video. IF YOU CAN'T CAPTURE THE TAPES I CAN ALSO OFFER TO DIGITISE THEM FOR YOU.

These camcorders are pretty difficult to find nowadays and this could be a cheaper alternative to video company services (often expensive). Based in Manchester, UK

£20 / day
