Its slick, professional design makes it fit in among any desk or work set up. The stand is well built and has a professional silver finish; the stand is also extremely strong and can even hold and charge my iPad mini with no problem at all. This stand does no damage and doesn't scratch the phone as it has grey pads to avoid friction with material, it also has 4 grey pads at the bottom

so it doesn't damage a desk and makes it hard to accidentally knock the stand over

Pros: The stand is simple, it takes a lot of time, your charging cable goes through the stand and comes deep enough to charge your phone on the stand.

Cons: Professional and recently sold for \$149.95 (ONE Word: ABOUT \$100.00) (well worth the small price and a great addition to any desk.)
