Precision injection molded out of the heaviest-grade high-impact polypropylene
 Stronger than most traditional bats and more durable too!
 These unimaginably strong Bats won't rot, crack, or splinter or even fade!
 Unbreakable!
 A Cold Steel Bat!

Product Description:

It's unbelievable. We're seeing eight to 10 bats break every game. Guys are coming back saying they hit the ball on the sweet spot and it still broke." this quote caught Cold Steel president, lynn c. Thompson's attention. It's from an article in the los Angeles times describing how frequently baseball bats break and nearly injure the players in major league games. The article chronicled the debate currently raging among players over which bat is better, those made of ash, which is lighter and slightly flexible, or those made of

maple which is heavier and stiffer. As he read, lynn began to suspect there might be a market for a baseball bat that just didn't break. What if it let alone the ball would not break. The bat was released in 2006, and the series of baseball bats have been consistent in their precision injection molded out of the heaviest-grade high-impact polypropylene that will not break. The bat can be used through the entire season. As they are made from polypropylene rather than wood or aluminum, they are not only stronger than traditional bats, but they are more durable too! our brooklyn bats won't rot, crack or splinter, or even fade! you need to worry about dirt affecting them either since they're impervious to the elements and clean up with little more than soap and water. They can be used as game bats, practice bats, warm-up bats, loaner bats, school or league bats or kid's bats. They can also serve as a cross over trainers to develop strength, agility and eye hand coordination for those studying Martial Arts. Reasonably priced, versatile, useful and virtually unbreakable, there's no excuse not to own a brooklyn bat by Cold Steel.
