Learn Guitar using Skype. Today skype lessons are a wonderful option and opportunity, and by using skype it is as if I am traveling to you, so you can learn in the comfort of your own home and distance is no problem. I teach acoustic guitar and also specialise in finger picking and enabling students to progress quickly and understand how to help themselves to become good guitar players.

My system of teaching has evolved from over four decades of playing experience, thus enabling an almost guaranteed high rate of success as has been proved time and again with hundreds of students, both children and adults aged 12 years upward.

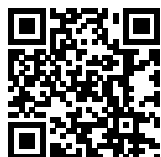

Part of the method involves "finger mechanics" for both hands, I call this "Aerobics for the Digits," the "Art of Doing," "Practical Theory" and rule no.1 "The Ear is the Boss" No you do not need to read music, my teaching focuses on the practical, actually playing the guitar, and any theory I teach is Practical Theory for example, understanding how chords, scales, modes work on the guitar etc... very easy to understand once taught in the right way. I cover things such as finger picking, strumming, tablature, chords, scales, modes, open and altered tunings and much more... I also have a lot of my own on-line Modules and Resources to enable you to succeed.

If you are interested in a speed system for learning guitar please feel free to contact me and we can arrange a booking. <http://guitaronskype/>
