

21quot Craftsman petrol lawnmower (40 GBP)

Location **South East, Middlesex**
<https://www.freeadsz.co.uk/x-524805-z>

I bought this brand new from Sears in the USA (Craftsman is their own brand of tools). I've had it for years and it still runs well. A big four stroke engine (6.75hp) means it just chugs through even long grass. A grass collector or leave that off for mulching. A while back it stopped running so I bought a new carburettor for it but it turned out it was stale petrol. A fresh tank of fuel and it ran perfectly. I also bought spare air filters for it, so there is a spare carb and four air filters in case you ever need them. I'm selling as I've sold my other house and have no need for two mowers now. This is a well made bit of kit that should last years, better quality than the cheap tat on the market these.
