Original Embalming Powder/ compound +27786787920 hager werken embalming powder made in Germany, available in Johannesburg South Africa.

Embalming is the art and science of preserving human remains by treating them (in its modern form with chemicals) to forestall decomposition. The intention is to keep them suitable for public display at a funeral, for religious reasons, or for medical and scientific purposes such as their use as anatomical specimens.[1]

hager werken embalming powder made in Germany, available in Johannesburg South Africa. Embalming is the art and science of preserving human remains by treating them (in its modern form with chemicals) to forestall decomposition. The intention is to keep them suitable for public display at a funeral, for religious reasons, or for medical and scientific purposes such as their use as anatomical specimens.[1] The three goals of embalming are sanitization, presentation and preservation (or restoration). Embalming has a very long and cross-cultural history, with many cultures giving the embalming processes a greater religious meaning.

Specific uses are:

sanitization, presentation and preservation (or restoration).
