

Bose SOLO Sound System (130 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-533305-z>

Instead of being positioned in front of your TV, Bose sees your TV actually sitting on top of the Solo. It is a novel idea. The Solo's top panel feels especially sturdy. For up to 42in TV.

Wide, even sound throughout the room from Bose speaker array technology More effects, music and dialogue, clearly and naturally with proprietary digital signal processing Single speaker fits neatly under your HDTV, no additional equipment needed Extremely easy setup, with one connection to your TV and one plug to the wall Simple four-button remote with power, mute and volume functions
