Cavachon Puppies F1 Health Tested Pedigree Parents

Stunning non-moulting and hypoallergenic F1 Cavachon puppies, can be seen with both mum and dad.

These puppies have been brought up in our loving home with both parents, my children and other animals - so are very well socialised and handled daily and used to all household noises.

Mum is our beautiful Blenheim King Charles Cavalier. She has been health tested under the current KC/BVA regulations for Heart/Eye, Episodic falling syndrome, Curly Coat/Dry Eye Syndrome. These tests are reassuring for new puppy owners that their puppy will be clear of any hereditary diseases. While dad is a pure snowy white pedigree Bichon Frise with no tear stains.

Cavachons make an ideal pet, not just for people who love them for their looks and wonderful temperament, but they are ideal for the allergy sufferer and house-proud.

They will leave us having been regularly wormed, vet checked, with vaccinations up to date and micro-chipped, together with a life time of support.

Each puppy will come with their own blanket with mum's and litter mate's scent and a bag of James Well beloved puppy food, which they have been weaned.
