

Cement mixer ,electric 240v mains. (60 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-534039-z>

Second hand well used mixer, still going strong.
Plug in normal 3 pin 240 volts mains plug.
Has additional on/off switch on the motor itself.
Motor cover can be held in the up position where it notches into a slot.
Can be used for mixing in the up position.
Fairly large drum , 2 ' diameter by 2' deep. Opening diameter at top is 17".
Overall total mixer height is 4 ' .
To tip the drum ,simply lift out a locking pin and turn the drum handle ,its geared down so it turns very easily.
Drum can rotate a full 360 degrees, and locked at whatever 'mixing' angle you want when you put the pin back in.
Easily movable as on 2 solid wheels and one prop stand, pick up the handle which lifts the stand and you can wheel it about.
I've used this over many years to do all the concrete around my house.
No longer really needed as I've gained another similar mixer.
Possibly can delivery locally for a price.
Please ask.
