my name is Hayley and I am a Microblading Technician based at my home clinic in Totton. I have recently trained in microblading and am looking to expand my client base. Microblading is a form of semi permanent eyebrow make up performed with a manual hand tool to create natural looking hair strokes throughout the brows.

I am looking for a salon who would like to offer this treatment, with the salon being able to advertise and provide the clients in return for a percentage of the treatment cost for each client provided or alternatively a set rate for room hire.

I would be looking to offer a clinic for one day either once or twice a month dependant on the interest. A maximum of 3 clients can be treated per day.

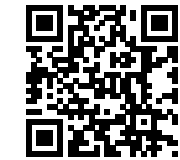

If you would be interested in providing this treatment for your salon please let me.
