

Experienced maths tutor available - both face-to-face and online maths tuition

Location **London, London**
<https://www.freeadsz.co.uk/x-538840-z>

I'm an experienced maths tutor (over 10 years of tutoring experience) with an excellent mathematical and tutoring background ready to prepare you for your maths patiently and with a focus on understanding the problem because then maths is not "the necessary evil" anymore and could even become your favourite subject (or not - but I will still make maths easier for you).

I have been tutoring maths since 2006. I have a bachelor degree in teaching mathematics for high schools, I worked for a couple of years in secondary SEN school, mostly with KS4 students - working on their Level 1, 2 and GCSE preparation.
 Now I focus on both private (face-to-face and online/distance) maths tuition and in school tuition.
 Available for homeschooling too (maths only).

Most of my private students are working towards GCSE up to higher tier and A-level maths (I cover mostly core maths, also some statistics). I tutor university students too - calculus, algebra, and geometry, other fields as statistics and more could be covered too, depends on specifications.

Distance tutoring forms also a significant part of my tutoring services and it's mostly based on a work being sent to you, not classic online tuition using Skype and online whiteboards (but that's an option too). My way of distance tuitions works well for a couple of years already for many of my students. If you are interested ask me for more details.

Group lessons (with a discount per person) are also available - ask me for more details.

For my students, if you don't live in my local area, the online/distance option is the best choice. I can offer distance tuition (ask me for more details) or more suitable for students with GCSE, A-level or university or face-to-face lessons in my local area (at least two hours blocks).

Get in touch - Veronika your Maths Tutor

Willing to travel: mostly Croydon (CR0, CR2, CR8) - for longer sessions (at least two hours blocks) other areas could be discussed
