A unique jewel must be worn exactly like a quality fragrance. You have to make your presence felt, attract attention and at the same time be discreet.

A wooden ring made by us is born in several stages, and the process of creation can take even several days.

Beginning from bending the wood, drying it, treating it against moisture, sticking it, turning it or sculpting it, preparing the inserts and acrylic treatment, it takes a lot of skill and patience!!

We are very pretentious when it comes to finishes and details, helping us to detach ourselves from other artisans working in the field.

The quality, durability of the woods rings that we work on still recommend us even after years of experience, That only make us!
