

# Airlines GDS Integration

**ABOUT ORISYS INFOTECH**

**About Orisys Infotech**

Orisys Infotech is a travel technology company providing complete travel booking software development. We provide GDS integration services, vehicle rental solution, hybrid mobile application development and many other IT solutions to travel and other industries. We develop customer vehicle rental booking engines, travel booking engines, and dynamic websites for travel portals, car rentals, flights & hotel bookings, package tour, villa rental, restaurants, event tickets booking, property & real-estate portals and many more.

**Our Services**

GDS and API Integration    Application Development    Software Development    Graphic Designing

**GDS** is an online system which has been bridging the gap worldwide between tour operators and travel bookers by providing centralized services for covering the bookings of airlines tickets, car rental and hotel rooms.

**Software development** is our main area of expertise. Achieving business goals for our customers by providing software solution is always our endeavor.

A website with easy to use functionality and fast loading for quick online transaction can generate more business, which ultimately lead to profit return on investment.

A Responsive, User friendly, easy to use, search engine friendly, mobile compatible and great looking website that fulfills all your business need.
