I provide computer services to home users and small businesses.
 With 15 years experience, no job is too small or difficult.

I can visit you at home or conduct a remote session to diagnose and fix your issue or assist with your request.

- Is your computer slow or unresponsive?
- Do you need assistance with installing software?
- Have you experienced an error that will not go away or is preventing you from completing a task?
- Are you worried your device is not secure?
- Have you lost some information and want to know if it can be retrieved?
- Would you like to improve the performance of your machine?
- Do you need help setting up and securing your WiFi?
- Are you experiencing poor WiFi signal and do you want to switch to a wired connection?
- Would you like to learn more about computers?
