The Honda FG110 mini tiller 25cc (cultivator) is a multi-purpose, lightweight, easy to use and efficient personal garden cultivator. It features fingertip controls and integrated folding handles that make it easy to use and transport.

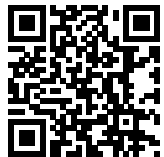

It's 4-stroke engine is incredibly quiet and virtually smoke free and it runs on unleaded fuel, so there's no more messing about mixing fuel and oil the way you would have to with a 2-stroke tiller. The worm gear transmission provides more torque than the common screw gear used on most mini tillers. This gives increased the Honda FG 110 cultivator efficiency under heavy load. The exclusive Honda hybrid tines dig and cultivate at the same time and the FG110's lightweight and ergonomic design makes moving it around the garden a joy.
