Sony Attac CD Walkman D-NE715 - Atrac 3 plus MP3 - Sonic Stage

This item is as new in perfect working order with all original packaging/boxes, manuals/paperwork, leads/connections with the player still having original details stickers attached. It also comes with the Sony CD waist belt case (also boxed)

Description:

In addition to all the uses a CD Walkman has always had, the ATRAC CD Walkman can play back music on CD-R/CD-RWs (ATRAC CD's) created by the ATRAC3plus/ATRAC3, which is an optimal compression system for music data. With a PC and the supplied SonicStage SIMPLE BURNER software, ATRAC CD's can be created simply and editing of titles, group settings can be handled with ease. The ATRAC3plus/ATRAC3 system can write as many as 30 CD albums onto 1 CD. (Using the supplied software/one album estimated at 60 minutes using 700Mb CD-R/RW media at 48kbps.

Get the high-tech, full-circle style and the most from digital music with Sony's D-NE715 portable CD player. The stylish player includes SonicStage CD Simple Burner software so you can take advantage of ATRAC3plus, Sony's proprietary music-compression technology when making custom MP3 CDs on a computer. The player includes Sony's popular Jog Dial control for easy folder navigation, a three-line dot-matrix display, 14 playback modes for the ultimate in music management and delivers more than 55 hours of continuous playback of audio CD or up to 95 hours of Atrac3plus playback.

ATRAC3plus is a high-quality audio-compression technology that reduces the size of digital audio files

while preserving much of a track's original sound quality (similar in concept to MP3 or Dolby Digital sound formats). With ATRAC3plus, music can be recorded and compressed at 132 kbps, 96 kbps, 64 kbps, or even 32 kbps (per second). You can select the right balance between quality and storage space (you can store up to 100 songs in just 160 kbps). The player comes complete with Sony's SonicStage CD Simple Burner software. Compatible with ID3 tags, the most common tags, this application transfers MP3, WMA, and AAC music files from a PC's hard drive and burns them to a CD using ATRAC3plus compression.

High-Skip-Free (Dog Pinch) G-Protection technology boosts the laser pick-up's shock protection to minimise read errors that would otherwise interrupt your music, providing quick recovery from both horizontal and vertical shocks. Bookmark playback lets you program favourite songs from multiple CDs and play them back at the touch of a button, and CD Text support displays artist and title information with compatible commercial audio CDs.
