Behavioural Training, Daily Use, Indoor, Toilet Training

Grey

Product Description

Catit Design Cat Sifting Litter Box makes scooping by hand a thing of the past.

The innovative Catit SmartSift features a simple, yet practical Pull-and-Refresh system that makes litter maintenance so much easier than using a scoop.

Pull lever to change litter

Easy for cats to exit

Pull the lever to change the litter - it's that simple

To refresh the litter pan, all you have to do is pull down on the lever to activate a seamless and noiseless process that quickly and efficiently sifts and disposes the waste for you.

So you no longer have to use a litter scooper!

SmartSift takes the chore out of litter maintenance

When you pull the lever, the cat pan inside the unit rotates and pours its contents into an integrated

sifter, which collects and then deposits waste in a lined, pull-out waste bin located below. Clean litter is then sifted back into the pan, ready for your cat. The system efficiently maximises the use of cat litter.

When it's time to get a new bag of sifted waste, simply pull down on the lever, remove the lined waste bin and dispose with appropriate Sift Bin or Bag. Replace with new bag. To refresh the litter, simply open the maintenance access door and add new litter.

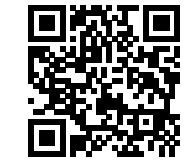

Catit Design Cat Sifting Litter Box includes a custom-fit biodegradable liner for the cat pan as well as one for the pull-out waste bin.

Rich in features and benefits

Catit Design Cat Sifting Litter Box is a safe manual system, with no motorised pieces that can heat up or fail over time and no expensive electronic parts to replace. This eco friendly feature is quiet and safe, making it very cat friendly, and the unit's closed design provides a cosy, private area for cats.

Besides the easy-to-use lever system, the cat pan also includes a carbon pad that helps control odors. There is also a large entrance for cats of all sizes, with a swinging door that closes on its own, ensuring that the unit is sealed shut, further controlling the spread of odors and dust.

Catit Design Cat Sifting Litter Box is suitable for all types of clumping litter.

Catit SmartSift Specs

Overall Dimensions

26"L x 19"W x 25"H

Internal dimensions of cat pan

19"L x 13"W x 17"H

Top five tips for getting your cat into SmartSift:

Set up Catit Design Cat Sifting Litter Box in the litter area of your home. During the transition process, keep your cat's current litter box next to SmartSift with some litter in the box and keep SmartSift's Maintenance Access Door open.

Add some used litter inside SmartSift. Mix used litter with new litter so that your cat can recognize his scent in the new litter box.

Reduce the amount of litter in the old litter box and do not continue to do any maintenance to the old litter box.

Remove the old litter box after your cat uses SmartSift for the first time.

When your cat is used to SmartSift, try closing the Maintenance Access Door, but monitor carefully to make sure your cat transitions properly.

Easy to empty

Easy to replace
