Hi there! Are you looking for the fastest way to improve your guitar playing skills?

You have come to the right place! EagleTabs is long established seller of guitar tablatures and backing tracks.

Learn to play the best riffs, chords and songs! Impress all around you with your quick progress. Undoubtedly, your composition skills will improve too.

All these songs and guitar tools for less price than one music lesson with a music teacher! This CD alone will be the best investment in a life skill that will reward you mentally, emotionally and even socially for all the years of your life.

WHAT'S ON THE CD?

This item is a software CD - the best guitar teaching tool available today.

It contains guitar tablatore editor, slowdown utility, audio editor, guitar tuner, free drills and scale exercises! It will improve your guitar playing skills in a most efficient way.

It's a new level of learning experience. Software plays the midi version of the song and highlights the notes being played. This offers you a tremendous advantage over the standard PDF or tablatore book.

You can always slow down or stop the song by simply hitting a space key. The notation contains notes and chords, making it easy to follow by any beginner.

The CD contains guitar tablatures for both electric & bass guitar, with a switch to change between the two. It also contains a guitar tuner, a slow down utility, an audio editor, free drills and scale exercises. You can edit and print the score or create one from your own song. The interface is easy to understand.

With full help included.
