

USA Parker Midi Fly UPGRADED Guitar and case (1,050 GBP)

Location **South West, Avon**
<https://www.freeadsz.co.uk/x-550371-z>

For Sale Parker Midi Fly with original case and strap it has the original Dimarzio pickups, humbucker bridge and two single coils it is about 15-16 years old and has some dinks and scratches on it mostly on the back of the body it has the carbon neck with stainless frets (no wear or marks on the frets) it is an easy and light guitar to play. It has been upgraded with the unreliable saddles (ball bearings always falling out and the piezo pickups breaking down) being replaced with the Graphtech string saver Ghost saddles and the internal midi system which was also very unreliable and prone to burn out and needed an external power supply to make it work has been replaced with the full Graphtech Ghost midi and acoustic system plus all extras available for this system/guitar it now will plug strait into a Roland synth pedal like the GR55 and you can have any sound from a piano to a sax or like an acoustic guitar or an electric guitar or any combination and of course is far more reliable and easier to connect to a synth pedal with a 13 pin lead (available on ebay or from Roland) the reason for sale is that I have just retired from work and I am trying to cut down on the toys I have around the house that I don't tend to use very often any questions don't hesitate to ask

cost when new was £2400 current cost for the nearest model is around £2800 the cost of the new updated and more reliable high tech system was over £400 for sale £1050.00 ovno Tel Andy 07982828739 079828287...(click to reveal full phone number) or 0117 9791225 0117 97912...(click to reveal full phone)
