

Nikon Coolpix L310 Digital Camera StillsVideo (80 GBP)

Location **Wales, South Glamorgan**
<https://www.freeadsz.co.uk/x-552098-z>

Hardly used. I'm selling this for my daughter. No original box but apart from that all good. Please read review below for about the camera. Call me anytime. Thank you.

Key Features14 megapixel CCD sensor21x optical zoom lens (35mm equiv: 25-525mm)Sensor shift vibration reduction (VR)3 inch LCD screenSports continuous mode720p HD video recordingISO 80 - 64001cm minimum focusing distanceSmart Portrait System

Nikon Coolpix L310 FeaturesThe L310 has a 14 megapixel CCD sensor and 21x optical zoom lens, which is a 35mm equivalent of 25-525mm. There is sensor shift VR (vibration reduction) to help reduce the effect of camera shake.

Shooting is made easy thanks to Easy Auto mode, which automatically adjusts the cameras settings for the scene. There are also 17 scene modes which can be manually selected as well as Sports Continuous and Smart Portrait System. This includes Smile Timer, Blink Proof, Skin Softening and Red-eye Fix.

Videos are recorded at 720p HD, with optical zoom available during recording.

Nikon Coolpix L310 HandlingThe L310 offers a rubberised hand grip as well as a rubber pad on the rear for your thumb, making it an easy camera to grip. As you may expect for a budget camera, the body is made from plastics, but it does have a metal tripod socket and a lock to keep the battery and memory card cover firmly in place. Nikon also supply a lens cap with the camera.

The menus system is simple and easy to navigate using the d-pad. The other buttons are typical for a digital compact, with a movie record button placed on the rear. The 3 inch LCD screen is clear and easy

The camera is powered by two AA batteries meaning it'll be easy to find replacements when needed. In terms of operating costs, as we made use of excess of 1000 shots during testing, the number of shots you will very much depend on the quality of batteries used.

We tested the cameras performance at focusing, shutter response, shot-to-shot time, continuous shooting etc. and have posted the results below. To test this we took 6 or more shots and calculated the average, so that consistent results were produced.

Shutter Response 0.25 secsWide - Focus / Shutter Response 0.45 secsFull Zoom - Focus / Shutter
