21x optical zoom lens (35mm equiv: 25-525mm)  
Sensor shift vibration reduction (VR)  
3 inch LCD screen  
Sports continuous mode  
720p HD video recording  
ISO 80 - 6400  
1cm minimum focusing distance  
Smart Portrait System

**Nikon Coolpix L310 Features** The L310 has a 14 megapixel CCD sensor and 21x optical zoom lens, which is a 35mm equivalent of 25-525mm. There is sensor shift VR (vibration reduction) to help reduce the effect of camera shake.

Shooting is made easy thanks to Easy Auto mode, which automatically adjusts the cameras settings for the scene. There are also 17 scene modes which can be manually selected as well as Sports Continuous and Smart Portrait System. This includes Smile Timer, Blink Proof, Skin Softening and Red-eye Fix.

Videos are recorded at 720p HD, with optical zoom available during recording.

Nikon Coolpix L310 Handling The L310 offers a rubberised hand grip as well as a rubber pad on the rear for your thumb, making it an easy camera to grip. As you may expect for a budget camera, the body is made from plastics, but it does have a metal tripod socket and a lock to keep the battery and memory card cover firmly in place. Nikon also supply a lens cap with the camera.

The menus system is simple and easy to navigate using the d-pad. The other buttons are typical for a

digital compact, with a movie record button placed on the rear. The 3 inch LCD screen is clear and easy to use. The camera is powered by 10.4V batteries, meaning it'll be easy to find replacement when necessary. The LCD rating of 14.1 inches, we made sure to process our samples for during testing. The number of pixels will very much depend on the quality of batteries used.

We tested the cameras performance at focusing, shutter response, shot-to-shot time, continuous shooting etc. and have posted the results below. To test this we took 6 or more shots and calculated the average, so that consistent results were produced.

Shutter Response	0.25 secs	Wide	Focus / Shutter Response	0.45 secs	Full zoom - Shutter	0.55 secs
