Rubber Playground/Workshop, Driveway Safety Matting, Ideal for Climbing Frames, Swings, Gateways etc. Mat size: 1500mm x 1000mm x 23mm overall thickness A robust safety mat designed with safety in mind and can be laid onto existing grassed areas to create a safe natural look, or indeed a simple quick fix for hard areas.

Suitable for all types of weather Requires no special skills of tools Quick and easy installation Absorbs shock and noise Reduce ground erosion Large opening of 20mm diameter holes allows liquid and debris to drain keeping the surface clean and dry. Ideal for green field sites, the mat disappears from view once the grass has grown through. No costly base work required. Typical uses... · Catering and Bar areas · Wet Rooms · Tack Rooms · Gateways · Grass protection · Anti-fatigue · Workbenches · Garage · Shed / Workshop · Floor protection · Play areas Used indoors to protect floors against heavy falling objects Provides good anti-fatigue relief for when standing for a long period of time Drainage Holes allow any liquids to disperse assisting with anti-slip Use outdoors in muddy grassed areas to protect ground and provide good standing Used to reduce the likely hood of serious head injury in play areas Holes also allow grass to grow through where required A straight edge and Stanley type knife is required for cutting

These mats are easy to clean with a wet mop and mild detergent or jetwash. Thickness is measured from
 1mm front of mat to bottom (total about 10mm). This product is produced from rubber and will
 have a rubber odour. It is purchased in bulk for our online retail, by the German Community and
 was sent realised it was to be sent to us. The price we are paying is a group saving on our outlay. \$1000
 (100's of \$14 packs of 1000). Colours are mixed from 100's of \$1000.

Pack of 10 rubber matting - ideal for equestrian areas. size 1500mm x 1000mm x 23mm thick
