Instantly Download My New, Easy-to-Read £44.97
eBook User Guide and Discover My Secrets about Building and Managing a Well Designed Microsoft
Access 2016 Database
From The Desktop Of: Ben Beitler (London, UK) – “Your Access Database Expert!”
Dear Friend,

Have you ever been in a situation that when you needed to know and learn about new technologies and products and you make that positive step of purchasing a book, CD, DVD or tried to successfully follow online tutorials of the subject realising that it's only the start and now you need to buy another product or study more tutorials and then another and another wondering when will I have enough knowledge to achieve my goal?

Well, you never stop learning! but believe me, I can relate. I was the same way for many years. Frankly, I made so many investments only to be sold more and more each time that if only someone was up front and said to me “You need to buy the complete set of X modules and books to really fully grasp the product”.

Fortunately for you, I'm now have a comprehensive eBook on Access 2016 – of great value!

This eBook can is a compilation of many eBooks currently priced at £14.97 (for older Access versions) each which in my opinion are great value too.

“How My £44.97 Guides Helps You ... Permanently”

I have put together a very comprehensive eBook guide totaling approximately 400 pages covering the following subjects; Tables, Queries, Forms, Reports and Macros. These are relevant to all MS Access versions but most of all dealing the concepts and methodologies are clearly explained and included in my MS Access 2010 database.

Well, for many years I've been teaching my friends and acquaintances computer-aided, er, I mean, and cajoled me to write a definitive guide about Microsoft Access databases, so keeping with tradition (and bringing it up to date with the latest version (2016)) – here it is:

A few people that have already had privileged preview access to this guide told me that the information shared in the few short pages of these guides is worth hundreds or even thousands of pounds.
