

Simple, low cost websites from Fae Design

Location **South West, Avon**
<https://www.freeadsz.co.uk/x-553514-z>

Simple, low cost and always built using the platform Wix for a reliable, professional experience including online customer support.

I love playing around with prebuilt templates to create websites with beautiful colours, interesting graphics and easy to use navigation links. It is easy to amend the templates and create something completely new, just for you.

I use wix for all my designs using pre-built layouts. These layouts can be completely customized to give your website a unique look. The benefits to using Wix as a platform for your own website are that it is easy for you to manage, it has built in support and vast community resources if you want to change it or develop it in the future.

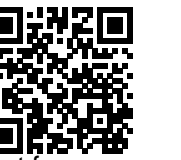

â€All the designs are completely responsive so visitors to your site have a great experience whether they are using a desktop computer or a mobile phone.

â€I am not a coding genius so will never baffle you with technical wizardry or web designer jargon like 'retina ready'. I design simple, elegant and functional websites for non-technical people to use and love. I have a support worker and training background so if you need extra help to learn how to use it then good training and patience are available as part of the package :-)

â€Tell me what you looking for and let the magic begin...
