

# Horizon Quantum QT Treadmill (190 GBP)

Location

North, Cheshire

<https://www.freeadsz.co.uk/x-557373-z>

The powerful Digital Drive motor powers speeds of up to 20km/h and an incline of up to 12%, remaining quiet and smooth even at the top levels. Coupled with the sturdy frame, you feel well supported so you can reach peak performance in comfort. Handy one-touch speed and incline controls located in the side bars make adjusting your workout easy.

All your important training feedback is delivered to you via the comprehensive display, allowing you to keep track of your performance with ease. With 10 multi-level programmes, including Heart Rate, Weight Loss, Intervals and more, you can 'design your own' workout and make the treadmill support your individual training needs. The console also features contact heart rate and a polar chip receiver for convenient heart rate monitoring. It has slightly dipped on the actual tread, thisnis at the front, it has no effect when running or walking on the machine, I am selling it at a low price because of this small defect. Brand new these cost around £1100. This is a awesome bit of machinery to get fit and to tone up all round. The treadmill is a heavy duty sturdy machine, you can fold it and it has wheels for easy mioning around and storage. Any questions welcome, more photos on request. Would be willing to swap also, something like (iPad, Apple Watch, Fitbit Alta HR) or what have you, just try you never know. Used condition but works perfectly fine. Perfect for the.
